## PRESCRIZIONI

| CODICE | DESCRIZIONE                                                                                                                                                                                  |
|--------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| A12    | Non è ammesso l'utilizzo di catene da neve (* l'utilizzo delle catene è ammesso se previsto dal costruttore per questa combinazione ruota\pneumatici).                                       |
| A56    | Questa combinazione ruota/pneumatico è consentita solo su veicoli con trazione integrale (es. 4WD, Quattro, Syncro, 4-Matic, 4x4, etc...).                                                   |
| A57    | Questa combinazione ruota / pneumatico è permessa su modelli di veicoli con trazione anteriore o posteriore e trazione integrale (per esempio, 2WD, 4WD, Quattro, Syncro, 4-Matic, 4x4, ecc) |
| A58    | Questa combinazione ruota/pneumatico non è consentita su vetture con trazione integrale.                                                                                                     |
| B02    | Prima del montaggio della ruota devono essere rimossi dalla flangia del mozzo eventuali viti di fissaggio od anelli di centraggio.                                                           |
| B03    | La montabilità della ruota non è verificata per veicoli che montano di serie solamente ruote più grandi o più larghe come equipaggiamento estivo (escluso pneumatici M+S).                   |
| B65    | La ruota speciale è consentita esclusivamente per le versioni del veicolo dotate di dischi freno del diametro di 345 mm sull'asse anteriore.                                                 |
| B72    | La ruota speciale non è consentita su versioni del veicolo dotate di dischi freno del diametro di 385 mm sull'asse anteriore.                                                                |
| BW1    | La ruota speciale non è consentita su versioni del veicolo dotate di dischi freno del diametro di 374 mm sull'asse anteriore.                                                                |
| BW7    | La ruota speciale non è consentita su versioni del veicolo dotate di dischi freno del diametro di 370 mm sull'asse anteriore.                                                                |
| Car    | L'applicazione del sistema è consentita esclusivamente su veicoli aventi carrozzeria station wagon (Avant, Break, Caravan, Kombi, Station-Wagon, Tourer, Turnier, Touring, ...).             |
| Cbo    | L'applicazione del sistema è consentita esclusivamente su veicoli aventi carrozzeria Cabriolet o Roadster.                                                                                   |
| Cpe    | L'applicazione del sistema è consentita esclusivamente su veicoli aventi carrozzeria coupé.                                                                                                  |
| Fih    | L'applicazione del sistema è consentita esclusivamente su veicoli aventi carrozzeria 2 volumi (3 porte e 5 porte)                                                                            |
| KmS    | L'applicazione del sistema è consentita esclusivamente su veicoli con portiere scorrevoli.                                                                                                   |
| KMV    | Riferito solo alle varianti di veicolo dotate come equipaggiamento originale di estensioni plastiche dei passaruota o dei parafranghi.                                                       |
| KoS    | L'applicazione del sistema non è consentita su veicoli con portiere scorrevoli.                                                                                                              |
| KOV    | Riferito solo alle varianti di veicolo non dotate come equipaggiamento originale di estensioni plastiche dei passaruota o dei parafranghi.                                                   |
| L04    | L'utilizzo di questa combinazione ruota/pneumatico è consentita su veicoli con tutte le ruote sterzanti (4WS).                                                                               |
| L05    | L'utilizzo di questa combinazione ruota/pneumatico non è consentita su veicoli con tutte le ruote sterzanti (4WS).                                                                           |
| Lim    | L'applicazione del sistema è consentita esclusivamente su veicoli aventi carrozzeria berlina.                                                                                                |
| LM4    | L'uso di queste combinazioni ruota/pneumatico è consentito sui veicoli con asse posteriore sterzante standard (4WS) con un angolo di sterzata massimo di 4,5°.                               |

## PRESCRIZIONI

| CODICE | DESCRIZIONE                                                                                                                                                                                                                                                                                 |
|--------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| M+S    | Questa dimensione del pneumatico è consentito solo come pneumatici M+S.                                                                                                                                                                                                                     |
| Npf    | La combinazione ruota-pneumatico non è consentita per i modelli di veicoli Fun, Cross e Scout (varianti di veicolo con parafanghi allargati).                                                                                                                                               |
| P35    | La ruota speciale non è consentita su versioni del veicolo dotate di dischi freno del diametro di 350 mm sull'asse anteriore.                                                                                                                                                               |
| Pe8    | La ruota speciale non è consentita su versioni del veicolo dotate di pinze freno Brembo con dischi del diametro di 309 mm sull'asse anteriore.                                                                                                                                              |
| R37    | Questa misura di pneumatico non è consentita su veicoli dotati di equipaggiamento originario avente pneumatici di diametro e/o larghezza maggiori.                                                                                                                                          |
| Sth    | L'applicazione del sistema è consentita esclusivamente su veicoli aventi carrozzeria 3 volumi.                                                                                                                                                                                              |
| V00    | Per applicazioni su veicoli a trazione integrale (per es. AWD, 4-Matic, Syncro, 4x4, ecc) non sono ammesse misure di pneumatici diverse su asse anteriore e posteriore.                                                                                                                     |
| V18    | Possono essere utilizzate misure di pneumatico diverse per asse anteriore e posteriore, a condizione che siano rispettate le combinazioni descritte qui sotto e che le rispettive misure di pneumatico siano singolarmente riportate nella colonna "Pneumatici" della tabella di cui sopra: |
|        | Asse anteriore    Asse posteriore                                                                                                                                                                                                                                                           |
